LS,

America always says to be the land of the Free, yet it kneels for the almighty Microsoft.  
Give your children the opportunity too choose what OS they like the most.  
Let them see what free  
Software can mean to them and to the rest of the world. The Software the donated PC should run should be  
every os except Microsoft Windows.

I support RedHats view on this, but it is not about what OS there is on the donated systems.  
But it is all bout the possibility to choose. With Microsoft you don't get this opportunity they tell you what to choose.

With Spyware, Virusses, Worms etc .... the people are held hostage whitout them suspecting a thing. They're privacy is  
compromised every day by people who appear as a saviours but who have only personal gain in mind.  
I cannot imagine that the US Judges can ignore these arguments and willingly expose they'r children to this new threat.

Regards
